Hello,

Please find attached the student's Career Guidance Report. Based on the information currently available, the student shows encouraging strengths in leadership and a clear interest in medicine and artificial intelligence.

The strongest recommendation at this stage is a Science and Health Exploration Track. Additional pathways for exploration include Healthcare AI / Medical Technology Specialist, Biomedical Informatics / Health Data Science, Public Health / Health Program Leadership, and, as a long-term goal, Physician / Doctor.

Please review the attached report and support the recommended learning roadmap over the coming weeks and months. Feel free to follow up with the school or counselor for further discussion on the next steps.
