CURRENT STATUS

Retained in Grade 7

EXECUTIVE SUMMARY

Severe academic underperformance with urgent wellbeing concerns

This report is best classified as an academic assessment with safeguarding escalation. Aarav Sharma recorded 160 out of 500, equivalent to 32.0%, with an overall grade of F and a class rank of 39 out of 42. Attendance is critically low at 37.7%, significantly reducing classroom continuity and learning recovery potential. Teacher observations indicate weak submission habits, low engagement, inattentiveness, and occasional disruptive behavior. In addition, disclosed self-harm thoughts and suicidal ideation elevate the case beyond academic concern and require immediate coordinated action involving school safeguarding staff, family, and professional mental health support.

PRIMARY ACADEMIC SIGNAL

32.0%

Performance is materially below expected grade-level standards across subjects.

PRIMARY ATTENDANCE SIGNAL

137

Days absent across 220 working days present a major barrier to improvement.

PRIMARY RISK SIGNAL

Critical

Immediate safety planning and urgent safeguarding follow-up are required.

Key Metrics and Status Indicators

OVERALL PERCENTAGE

32.0%

Far below minimum academic expectations.

OVERALL GRADE

F

All listed subjects are reported at failing level.

ATTENDANCE

37.7%

83 present days and 137 absences.

CLASS RANK

39/42

Placed near the bottom of the cohort.

PROMOTION STATUS

Retained

Student is not promoted to the next grade.

SAFEGUARDING STATUS

Critical

Urgent wellbeing escalation is required.

Subject Highlights

Subject data indicates broad failure, with only limited comparative strengths visible in available scores.

ATTENDANCE STATUS

Critical Risk

Attendance is the most significant structural barrier to academic recovery. Without immediate improvement in daily presence, sustained intervention in core subjects is unlikely to succeed.

ATTENDANCE INSIGHT

Strengths and Achievements

Comparative Strength: Computer Science is the highest recorded subject score and may serve as an engagement anchor for rebuilding confidence.

Secondary Strength: English Language shows the next strongest relative result, suggesting some potential for literacy-based reinforcement.

Assessment Completion: Examination results are available across listed subjects, providing a complete baseline for intervention planning.

Partial Participation: Practical or activity evidence suggests the student is capable of engaging when structure and support are present.

Actionable Baseline: The current data clearly identifies where support must begin, allowing immediate prioritization.

Areas for Improvement

Academic Recovery: Improvement is required across all listed subjects, with particular urgency in Mathematics, Science, and Social Studies.

Attendance Restoration: Attendance must increase substantially to rebuild continuity, participation, and assignment completion.

Submission Habits: Assignment completion and timely submission need daily monitoring and reinforcement.

Classroom Engagement: Attention, participation, and task focus require structured support.

Behavioral Regulation: Reported disruptive behavior and school-rule concerns indicate a need for closer pastoral monitoring.

Home-School Stability: Family tension and emotional distress are affecting readiness to learn and should be addressed in coordination with support services.

STATUS BANNER

Critical safeguarding concern requiring immediate action

Overall Risk Position

The data indicates a combined academic and wellbeing emergency. In addition to severe academic underperformance and chronic absence, the student has disclosed self-harm thoughts and suicidal ideation. This requires same-day safeguarding review, safety planning, and close monitoring.

Key Risk Drivers

Recent mood and behavior changes, withdrawal from activities, physical stress symptoms, family tension, and direct statements suggesting self-harm thoughts significantly elevate risk beyond routine pastoral concern.

Parent Perspective

The parent reports concern following noticeable changes over the past one to two weeks, including withdrawal, irritability or tearfulness, and reduced enjoyment of activities, and has appropriately sought support.

Student Perspective

The student reports tiredness, physical discomfort, a tense home environment, and thoughts that indicate emotional overload and possible hopelessness. These disclosures must be treated as urgent and credible.

Warning Indicators

Social withdrawal

Anxiety or stress

Behavioral changes

Physical symptoms

Family tension

Self-harm indicators

Suicidal ideation

Required Response

Immediate next step: Urgent safeguarding escalation and same-day wellbeing review.

Support needed: Family communication, internal school safeguarding involvement, and referral to professional mental health services.

Recommendations and Action Plan

Daily Structured Study Plan

Introduce a supervised after-school study routine with short sessions, homework tracking, and clear daily expectations.

HIGH PRIORITY

Attendance Recovery Protocol

Implement immediate attendance monitoring with daily follow-up on absences and weekly review between home and school.

IMMEDIATE PRIORITY

Core Subject Intervention

Prioritize Mathematics, Science, and Social Studies for remedial teaching and targeted catch-up support.

IMMEDIATE PRIORITY

Engagement and Focus Support

Use shorter tasks, timed learning blocks, and frequent check-ins to improve attention and classroom participation.

HIGH PRIORITY

Parent-Teacher Review

Hold an urgent parent-teacher meeting to align academic expectations, attendance goals, and support responsibilities.

IMMEDIATE PRIORITY

Behavior Monitoring Targets

Set weekly measurable goals for assignment submission, behavior, punctuality, and rule compliance.

HIGH PRIORITY**Safeguarding Escalation**

Activate urgent safeguarding procedures, complete a safety plan, and ensure continuous monitoring in line with school policy.

CRITICAL PRIORITY**Wellbeing and Mental Health Referral**

Arrange school counseling support and facilitate prompt access to qualified external mental health professionals.

CRITICAL PRIORITY**Family Support Check-In**

Maintain calm daily communication at home, monitor changes closely, and notify the school immediately if risk indicators escalate.

HIGH PRIORITY**Professional Remarks**

The student presents a high-risk profile due to the convergence of poor academic attainment, chronic absence, low engagement, and serious safeguarding concerns. Educational recovery is possible only if attendance, emotional safety, and consistent adult support are addressed simultaneously.

OVERALL PROFESSIONAL ASSESSMENT

Teacher feedback identifies serious underperformance, weak assignment completion, low attentiveness, and occasional disruptive behavior. These observations are consistent with the wider risk pattern shown in the available school and wellbeing data.

TEACHING STAFF SUMMARY**Concluding Remarks**

This report indicates that Aarav Sharma requires immediate, coordinated intervention rather than routine academic support alone. The priority sequence is clear: ensure safety, stabilize attendance, re-establish engagement, and then deliver focused academic recovery. Close collaboration between family, teachers, safeguarding staff, and wellbeing professionals is essential to improve outcomes.
